Share Volume data between containers

1 Get another container's Vol. data

```
$ docker run -itd --name beta-busybox -
-volumes-from alpha-busybox:ro busybox
```

2 Inspect the container

```
$ docker inspect beta-busybox
```

3 Execute shell in busybox container

```
$ docker exec -it beta-busybox sh

  ls /tmp

  cat /tmp/foo.txt

  exit
```
