Building your First Docker Image and Running a Container from it

1 **Build Docker Image from Dockerfile**

```
$ docker build -t nginx-original .
```

2 **List out Docker images on host.**

```
$ docker images
```

3 **Run a container from Docker Image**

```
$ docker run -d --name original -p
8080:80 nginx-original
```

4 **List out containers on Docker host**

```
$ docker ps -a
```
