Working with Intermediate Images using Docker History

1 **List out Images**

```
$ docker images
```

2 **List out Registry Image's layers**

```
$ docker history registry:latest
```

3 **Detailed list of Registry image's layers**

```
$ docker history registry:latest --no-trunc
```

4 **Format the result using Go template**

```
$ docker history --format "table {{.ID}}\t{{.CreatedBy}}" registry:latest
```

Cerulean Canvas

5 Format non-truncated output with Go template

```
$ docker history --format "table
{{.ID}}\t{{.CreatedBy}}" --no-trunc
registry:latest
```

Cerulean Canvas
