Node Affinity in Kubernetes

1 List out nodes with labels

```
$ kubectl get nodes --show-labels
```

Pod definition YAML

```yaml
apiVersion: v1
kind: Pod
metadata:
  name: busybox-manager
spec:
  affinity:
    nodeAffinity:

requiredDuringSchedulingIgnoredDuringExecution:
        nodeSelectorTerms:
        - matchExpressions:
          - key: type
            operator: In
            values:
            - k8s-workload
  containers:
  - name: busybox-manager
    image: busybox
```
