Setup Container DNS

1 **Show the DNS settings of the host**

```
$ cat /run/systemd/resolve/resolv.conf
```

2 **Run a container**

```
$ docker run --rm -d --name nginx-test nginx
```

3 **Print DNS settings of nginx container**

```
$ docker exec -it nginx-test cat /etc/resolv.conf
```

4 **Change the default DNS of container**

```
$ docker run -d --name nginx-dns -p 8080:80 --dns 1.1.1.1 nginx
```

Cerulean Canvas

5 Print DNS settings of nginx container

```
$  docker exec -it nginx-dns cat
/etc/resolv.conf
```
