Inspecting Docker Images

1 Inspect Docker Registry Image

```
$ docker image inspect registry:latest
```

2 Find a specific detail from inspect o/p

```
$ docker image inspect --
format="{{.RootFS.Layers}}"
registry:latest

Note:
If you face syntax error with the above
command, please DO NOT copy the inverted
commas before and after .RootFS.Layers

We recommend you to manually insert
inverted commas while typing the command.
```
