How to write Dockerfiles - (Part 1) Basic Dockerfile Instructions

1 Make a new directory & set it as PWD

```
$ mkdir nginx

$ cd nginx
```

2 Write a Dockerfile for nginx

```
$ nano Dockerfile

ARG VERSION=18.04

FROM ubuntu:${VERSION}

RUN apt-get update && apt-get install
-y curl nginx \
    && apt-get clean \
    && rm -rf /var/lib/apt/lists/*

EXPOSE 80

ENTRYPOINT ["nginx", "-g"]

CMD ["daemon off;"]
```
